

World-leading
derivatives solutions
from SuperDerivatives®

SuperDerivatives® (SD) empowers institutions to increase the profitability of their derivatives business through a rich offering that includes independent pricing, wide asset coverage, consistent methodology, and unrivalled risk management tools.

The company provides world-leading derivatives solutions to thousands of customers in over 60 countries, including banks, corporates, fund managers, auditors and central banks, giving them peace of mind about their derivatives business.

opportunities
maximised

Why choose SuperDerivatives?

Founded in 2000, SD has become the world's derivatives benchmark, trusted by thousands of customers across the globe to provide prices reflective of the interbank broker market. The widest coverage of instruments and asset classes, covering FX, interest rates, equities, commodities and credit, has positioned the company as a true market leader and innovator in its field.

Real-time accurate pricing for all structures through a unique methodology provides a financial compass for pre-trade price discovery and post-trade strategy monitoring, from front to middle office. SD enriches institutions' derivatives business by offering a customisable, easily-integrated and multi-asset service that enhances productivity, transparency and accuracy throughout the organisation. The unique set of solutions enables maximisation of business opportunities by creating and distributing vanilla and advanced derivatives strategies and trading ideas across organisations – and to customers – while increasing collaboration and productivity.

A web-delivered service gives a set of efficient, trusted and independent derivatives pricing, workflow and risk management tools, which are constantly updated and enhanced, as well as a market-leading portfolio revaluation service.

BENEFITS INCLUDE:

- > **Cutting-edge technology** that enables rapid, market-reflective derivatives price discovery
- > Comprehensive, independent **portfolio valuation** solution
- > Comprehensive **derivatives coverage** - respond more effectively to market needs
- > **Multi-asset tools** – covering FX, interest rates, equities, commodities, energy and credit derivatives
- > **Risk management** – an independent level of assurance about derivatives portfolios
- > **Market-accurate pricing** based on multi-sourced, quality-validated data in conjunction with a proven, unique pricing **methodology** and ongoing market calibration – keep customers in tune with the markets
- > Streamlined, efficient and web-delivered for fast, **cost-effective** implementation and **seamless integration** and upgrades
- > **Flexible** and **configurable** – customise according to exact requirements
- > **Scalable** – expands with growing businesses
- > **User-friendly GUI** enables users to quickly expand their derivatives knowledge
- > Dedicated technical and product **support**, 24 hours a day

Cost-effective and productivity-enhancing

SD's applications and services are implemented using robust, scalable, secure, cost-effective and proven state-of-the-art technologies.

The company is a SaaS (Software as a Service) pioneer, delivering rich, live and secure applications over the web for ease of integration and rapid time to market.

By providing an all-in-one web solution, as well as support and training, SD offers fast roll-out and low total cost of ownership, compared to in-house or traditional installed systems where the cost of infrastructure to keep pace with rapid increase in the complexity of traded instruments can be prohibitive.

SD's solutions remove the typical IT problems that can be incurred by software consumers in the traditional client/server model, enhancing productivity and leaving IT personnel to focus on improving the day-to-day technical operations of the company.

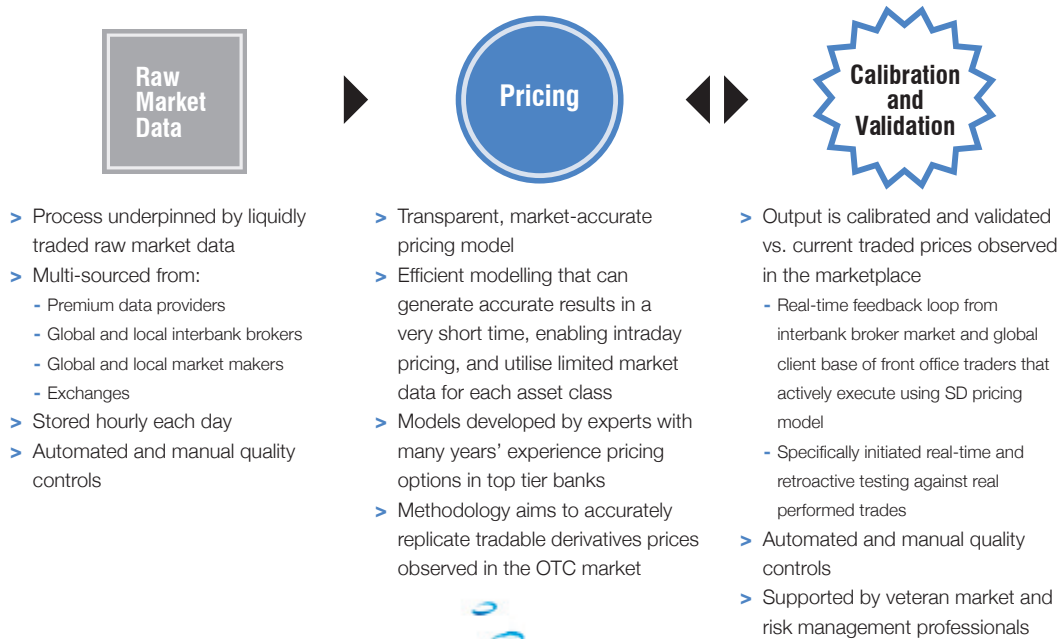

productivity
enhanced

Unique methodology, proven technology

SD's solutions are enabled by an automated web service based on a unique, market-appropriate and certified analytics methodology, 'The Gershon Model,' and thousands of market data sources.¹

Derivatives price discovery process

Complete solutions for all market participants

SD's solutions enable opportunity management across all departments, for use by all practitioners - including traders, sales, treasurers, risk controllers, portfolio managers, hedge fund managers, fund administrators and auditors - allowing them to excel in their derivatives management activities. Services include:

Portfolio revaluation services

SD-Revaluation™ is a comprehensive solution for the independent revaluation of an organisation's entire derivatives portfolio. Supported by a proven pricing methodology, SD-Revaluation provides investors with the highest levels of transparency and enables them to comply with required accounting, auditing and regulatory requirements.

SD-Revaluation delivers fully-automated, same-day revaluation of even the largest portfolios, ensuring that users have the independent, fair market value of their portfolio as soon as they need it.

entire
workflow

SD-Mark-to-Market Data™ from SD provides middle and back office professionals, risk managers, controllers and auditors with 'on demand' quality, accurate and independent market-accurate risk reference data, facilitating self-service revaluation of the complete portfolio and compliance with key standards that require the determination of fair market value (FMV) of derivatives in all asset classes.
